

Submersible pumps

The electric submersible sewage pumps have been specially designed to operate submerged in the pumped fluid. The hydraulic section is close coupled to the electric motor making the pumping unit compact, easy to install and reliable in operation. The pumps are essential in depuration systems and are widely used in the sewage handling facilities of industry and local communities. The GK series electric pumps are designed to pump sewage containing gas, compacted solids and long fibrous material. The pumps can be supplied for fixed or submersible installation with base frame. The design has paid particular attention to achieving a good overall efficiency to ensure that the pumps are as cheap as possible to run.

MOTOR

Asynchronous, three-phase with squirrel-cage rotor. The motor is cooled by the fluid in which it is submerged or by a forced cooling system. The motor is separated from the pump by a large chamber partially filled with oil that acts as a lubricant for the mechanical seals and as a heat exchanger. Ensure compliance with the minimum head value given with the dimensions of each individual electric pump in order to ensure that the motor is correctly cooled, the exception being made for motors with forced cooling.

SUPPORTS

The shaft of the motor, on the extension of which the impeller is mounted, is guided by two bearings prelubricated with grease; the lower one supports the axial thrust. The rotating assembly is very compact, with a short overhung pump shaft which reduces bearing loads and ensures reliability and long life.

MECHANICAL SEALS

The double mechanical seal (mounted in series) is a dual protection safeguarding the electric motor. If the seal on the pump side becomes faulty, the motor will not be damaged thanks to the second seal on the motor side. These seals are made of particularly suitable materials able to withstand heavy-duty conditions; the pump side seal is made with abrasionproof materials.

SAFE OPERATION

- The conductivity sensor in the oil chamber warns if there is water and transmits the relative signal to the appropriately preset electric panel. This checks that the mechanical seals on the pump side operate correctly.
- The motor is equipped with thermal probes connected in series in the stator winding. Should over-temperature conditions occur, the probes automatically cut off the power.

Electric pumps of the GK series feature three different hydraulics with the following characteristics.

Page 280

GKV

RETRACTED VORTEX IMPELLER

The impeller offers reliability against clogging due to the feature of wide through passages, and a good resistance to wear thanks to the absence of shimming. The versatility of use compensates for this impellers somewhat lower efficiency. The impeller can be reduced in dimension to offer different characteristics. For water containing a large amount of solids and long fibre, sewage with a high gas and sludge content.

Page 293

GKC

SINGLE-CHANNEL IMPELLER

It offers reliability against clogging and features wide through sections and a good resistance to wear, low mechanical action on the fluid, high hydraulic efficiency. Particularly suitable for clean water, water containing solid and fibrous solids, cloacal water, sewage and sludge. Low vibrations thanks to the dynamically balanced impeller.

Page 316

GKN

DOUBLE CHANNEL IMPELLER

It offers reliability against clogging and features wide through sections and a good resistance to wear, low mechanical action on the fluid, high hydraulic efficiency. Particularly suitable for clean water, water containing solid and fibrous solids, cloacal water, sewage and sludge. Low vibrations thanks to the dynamically balanced impeller.

Page 327

GKG

SHREDDER

Made of very hard stainless steel, the shape of the shredder ensures long-life and fade-free shredding capacity. Waste water disposal from gas stations, community housing and neighbourhoods. No particular tools are required to replace this part.

STANDARD INSTALLATIONS

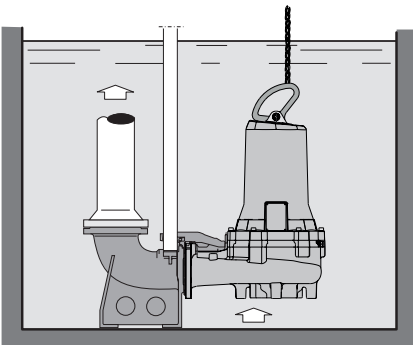

Mobile and emergency immersed installation with support foot

Version only recommended with electric pump installed on a solid and flat support surface and with flexible delivery pipe, particularly suitable for:

- all occasional or exceptional uses
- use on site or where mobility is required
- renovation of existing stations with architectural constraints.

The support frame, flexible delivery pipe bend, chain, etc. are available.

Fixed installation with guide chute and automatic coupling base.

It is the most suitable installation for fixed lifting stations. No special building infrastructures are required and the system is easy to build. The quick coupling allows quick and easy extraction and subsequent repositioning

of the electric pump in the tank, allowing ordinary maintenance or exceptional interventions to be performed in complete safety without having to enter the collection tank. The coupling foot, guide pipes, chain, etc. are available for this installation.

IN A DRY CHAMBER

It is the horizontal or vertical installation that requires a dry chamber, adjacent to the liquid collection tank, to house the electric pump unit.

Compared to traditional non-submersible machines, it has maximum operating safety and absence of risks even in the event that the dry chamber is submerged in liquid. Support stands are available.

HORIZONTAL

With outlet vent pointing upwards. The electric pump is attached with support brackets.

This arrangement requires a limited number of special pieces. The suction is horizontal and the delivery is vertical with a limited overall height.

VERTICAL

This arrangement allows for maximum ease of inspection and maintenance, the suction and delivery are horizontal and it ensures minimum overall dimensions in plan configuration.

Submersible pumps with vortex impeller

Construction

Submersible pumps with vortex impeller. The impeller offers reliability against clogging due to the feature of wide through passages, and a good resistance to wear thanks to the absence of shimming. The versatility of use compensates for this impellers somewhat lower efficiency. The impeller can be reduced in dimension to offer different characteristics. Delivery port DN 65-80-100.

Applications

For waste water and sewage with suspended bodies and with the presence of filamentous bodies, they are particularly suitable for the emptying of wells or primary collection tanks and septic tanks in domestic, residential and industrial installations. Solid passage from 40 to 100mm

Operating conditions

Liquid temperature: from 0°C to +40°C.
 Maximum immersion depth: 20m (with cable of suitable length).
 Maximum working pressure: 80 m.w.c.
 pH of the liquid to be lifted: 4 ÷ 10
 Continuous service (with water at minimum immersion level).

Materials

Pump casing: cast iron EN-GJL250 UNI-EN 1561-11
 Impeller: cast iron EN-GJL250 UNI-EN 1561-11
 Motor casing: cast iron EN-GJL250 UNI-EN 1561-11
 Shaft: stainless steel X20Cr13 (AISI420)
 Motor side mechanical seal: graphite/ceramic
 Pump side mechanical seal: silicon carbide/ceramic

Motor

Induction motor with 2, 4 or 6 poles, 50Hz.
Three-phase version: 400V ± 10% up to 4.8 kW
 400/690V ± 10% from 5.8 kW
 Isolation class: H
 Degree of protection: IP 68
 Max number of starts per hour:
 - 20 up to 5 kW
 - 15 up to 10 kW
 - 10 for higher powers
 Cable: length 10m
 Direction of rotation: clockwise top view
 Motor suitable for operation with frequency converter.

Designation

GKV4 65-55D-0021F
 GK = Series
 V = Vortex impeller
 4 = Number of poles
 65 = Delivery port diameter in mm
 55 = Free passage in mm
 D = Impeller trim
 0021 = Motor size kW x 10
 F · = · Electric motor flange size

= In case of operation in a dry chamber or with a low level of the pumped liquid, it is necessary to introduce the cooling oil according to the quantities indicated in the use and maintenance manual

L1min = Minimum submergence depth for motor without casing with continuous duty S1 (NPSHR permitting)

Lmin = Minimum submergence depth for motor without casing with intermittent duty S3 (NPSHR permitting)

Submersible pumps with single channel impeller

Construction

Submersible pumps with single-channel impeller. It offers reliability against clogging and features wide through sections and a good resistance to wear, low mechanical action on the fluid, high hydraulic efficiency. Low vibrations thanks to the dynamically balanced impeller. Delivery port DN 65-80-100-150-200-250

Applications

Particularly suitable for clean water, water containing solid and fibrous solids, cloacal water, sewage and sludge. Particularly suitable for the emptying of sewage from cesspits or primary collection tanks or industrial waste water. Solid passage from 40 to 163 mm.

Operating conditions

Liquid temperature: from 0°C to +40°C.
Maximum immersion depth: 20m (with cable of suitable length).
Maximum working pressure: 80 m.w.c.
pH of the liquid to be lifted: 4 ÷ 10
Continuous service (with water at minimum immersion level).

Materials

Pump casing: cast iron EN-GJL250 UNI-EN 1561-11
Impeller: cast iron EN-GJL250 UNI-EN 1561-11
Motor casing: cast iron EN-GJL250 UNI-EN 1561-11 / EN-GJL450 UNI-EN 1561-11
Shaft: stainless steel X20Cr13 (AISI420)
Mechanical seal pumps with insulation class H
- motor side: graphite/ceramic
- pump side: silicon/ceramic carbide
Mechanical seal pumps with insulation class F
- motor side: stainless steel/graphite
- pump side: Silicon carbide/silicon carbide

• = Standard
- = Not present

o = Optional

= Version with oil chamber

= In case of operation in a dry chamber or with a low level of the pumped liquid, it is necessary to introduce the cooling oil according to the quantities indicated in the use and maintenance manual

Motor

2,4,6,8 pole, 50Hz induction motor.
Three-phase version: 400V ± 10%, up to 4.8kW
400/690V ± 10% from 5.8kW
Isolation class: F or H
Degree of protection: IP 68
Max number of starts per hour:
- 20 up to 5 kW
- 15 up to 10 kW
- 10 for higher powers

Cable: length 10m
Direction of rotation: clockwise top view
Motor suitable for operation with frequency converter.

Designation

GKC4 100-80A-0058R
GK = Series
C = Single-channel impeller
4 = Number of poles
100 = Delivery port diameter in mm
80 = Free passage in mm
A = Impeller trim
0058 = Motor size kW x 10
R = With cooling jacket

submersible pumps with channels impeller

Construction

Submersible pumps with multi-channel impeller.
 Characterised by good protection against clogging, large spherical passages, good wear resistance, low mechanical action on the fluid and high hydraulic efficiency at high flow rates.
 Low vibrations thanks to the dynamically balanced impeller.
 Delivery port DN 200-250-300-350.

Applications

For the movement of sewage and sewage grates.
 Particularly suitable for the emptying of sewage from cesspits or primary collection tanks or industrial waste water.
 They replace single-channel pumps when a high solids passage diameter is not required.
 Solid passage from 100 to 164 mm.

Operating conditions

Liquid temperature: from 0°C to +40°C.
 Maximum immersion depth: 20m (with cable of suitable length).
 Maximum working pressure: 80 m.w.c.
 pH of the liquid to be lifted: 4 ÷ 10
 Continuous service (with water at minimum immersion level).

Materials

Pump casing: cast iron EN-GJL250 UNI-EN 1561-11
 Impeller: cast iron EN-GJL250 UNI-EN 1561-11
 Motor casing: cast iron EN-GJL250 UNI-EN 1561-11 / EN-GJL450 UNI-EN 1561-11
 Shaft: stainless steel X20Cr13 (AISI420)
 Mechanical seal pumps with insulation class H
 - motor side: graphite/ceramic
 - pump side: silicon/ceramic carbide
 Mechanical seal pumps with insulation class F
 - motor side: stainless steel/graphite
 - pump side: Silicon carbide/silicon carbide

Motor

Induction motor 4-6 or 8 poles, 50Hz
 400/690V ± 10%
 Isolation class: F or H
 Degree of protection: IP 68
 Max number of starts per hour:
 - 20 up to 5 kW
 - 15 up to 10 kW
 - 10 for higher powers
 Cable: length 10m
 Direction of rotation: clockwise top view
 Motor suitable for operation with frequency converter.

Designation

GKN4 200-100A-0260R
 GK = Series
 N = Multi-channel impeller
 4 = Number of poles
 200 = Delivery port diameter in mm
 100 = Free passage in mm
 A = Impeller trim
 0260 = Motor size kW x 10
 R = With cooling jacket

L1min = Minimum submergence depth for motor without casing with continuous duty S1 (NPSHR permitting)

Lmin = Minimum submergence depth for motor without casing with intermittent duty S3 (NPSHR permitting)

Submersible pumps with high power grinder

Construction

Submersible pumps with high cutting power shredder system.
 Made of very hard stainless steel, the shape of the shredder ensures long-life and fade-free shredding capacity.
 No particular tools are required to replace this part.
 Delivery port DN 40.

Applications

To move water containing long filamentary materials, paper or textile material.
 They are particularly suitable for the disposal of waste water in domestic, residential and industrial use.
 Solid passage 4 mm.

Operating conditions

Liquid temperature up to 40°C.
 Maximum immersion depth: 20m (with cable of suitable length).
 Maximum working pressure: 80 m.w.c.
 pH of the liquid to be lifted: 6 ÷ 10
 Continuous service (with water at minimum immersion level).

Materials

Pump casing: cast iron EN-GJL250 UNI-EN 1561-11
 Impeller: cast iron EN-GJL250 UNI-EN 1561-11
 Motor casing: cast iron EN-GJL250 UNI-EN 1561-11
 Shaft: stainless steel X20Cr13 (AISI420)
 Motor side mechanical seal: graphite/ceramic
 Pump side mechanical seal: silicon carbide/ceramic

Motor

Induction motor 2.4 poles, 50Hz
Three-phase version: 400V ± 10% up to 4.8 kW
 400/690V ± 10% from 5.8 kW
 Isolation class: H
 Degree of protection: IP 68
 Max number of starts per hour: 20 at regular intervals
 Cable: length 10m
 Direction of rotation: clockwise top view
 Motor suitable for operation with frequency converter.

Designation

GKKG2 40-4T-0020
 GK = Series
 G = Impeller with shredder system
 2 = Number of poles
 40 = Delivery port diameter in mm
 4 = Free passage in mm
 T = Impeller trim
 0020 = Motor size kW x 10

Installation with duck foot coupling

- 2 Submersible pump
- 3 Duck foot coupling
- 4 Guide pipes
- 5 Delivery pipe
- 6 Check valve
- 7 Gate valve
- 8 Level floats
- 9 Control box
